

ARYA T A

Python Developer | Fresher

Kakkodi, Kerala 673611 | 8590549077 | aryamohan053@gmail.com | linkedin.com/in/arya-ta | github.com/aryamohan053dev

PROFESSIONAL SUMMARY

Python Developer, recently completed an MCA, with a 4-month internship and academic projects giving hands-on exposure to building and deploying full-stack web applications using Python, Django, and Flask. Skilled in developing RESTful APIs, working with MySQL and SQLite databases, and using Git for version control. Comfortable working across the stack with HTML, CSS, JavaScript, and React, and collaborating with cross-functional teams to deliver reliable, well-tested software. Quick learner, strong problem solver, and eager to grow into a full-time role.

TECHNICAL SKILLS

Languages: Python, JavaScript

Web Frameworks: Django, Flask, RESTful API development & integration

Databases: MySQL, PostgreSQL (working knowledge), SQLite, MongoDB

Tools & Practices: Git, GitHub, Postman, CRUD Operations, OOP, DBMS, SDLC

Frontend: React, HTML5, CSS3, JavaScript

WORK EXPERIENCE

Python Full Stack Intern — Maxlore

4 months

- Developed full-stack web applications using Python, Django/Flask, JavaScript, and SQL databases, delivering 5 core modules to support business and user requirements.
- Engineered and deployed 12+ RESTful API endpoints to enable secure, real-time communication between frontend interfaces and backend services.
- Integrated frontend and backend modules, resolving 15+ recurring functionality issues and improving overall user experience.
- Optimized database queries and application workflows, improving average data retrieval speed by 30% and overall application responsiveness.
- Collaborated with a cross-functional team of 4 developers on debugging, testing, and deployment activities throughout the software development lifecycle.

PROJECTS

ALUMNI — Alumni Management System

Python, HTML, CSS, SQLite

- Built a centralized alumni management platform supporting 500+ alumni profiles and streamlining administrative operations.
- Implemented secure user authentication and authorization features, safeguarding data for 300+ registered users.
- Designed CRUD functionalities enabling efficient creation, retrieval, updating, and deletion of 500+ alumni records.
- Architected a structured SQLite database schema to organize and manage alumni information across 6 data tables.

TripGenie — Travel Management System

Python, React, MySQL

- Created an end-to-end travel management application with an administrative dashboard, supporting 200+ trip bookings.
- Crafted responsive user interfaces using React, improving usability and accessibility across 10+ screens.
- Connected backend services and database operations using Python and MySQL to ensure reliable, real-time data sync.
- Delivered travel and user management features that streamlined administrative processes and cut manual workload by 25%.

EDUCATION

Master of Computer Applications (MCA) — College of Engineering Thalassery

2024 - 2026

Bachelor of Computer Applications (BCA) — JDT Arts & Science College

2021 - 2024

KEY STRENGTHS

Analytical Problem Solving • Debugging & Troubleshooting • Collaborative Development • Adaptability • Technical Communication • Willingness to Learn
